Nov/Dec 2008

Keith Jacobson, PE, LEED AP has passed his LEED AP exam and attained LEED® Accredited Professional status. Mr. Jacobson's creative thought process and teamwork approach on projects provide the collaborative effort required to obtain the appropriate level of LEED certification for your projects. VAA offers LEED accredited professionals in both civil and structural engineering and is excited to offer this added value to your projects throughout the United States. We are proud to be celebrating our 30th Anniversary of offering quality consulting services to the commercial, agribusiness and industrial markets.

Dave Olheiser, PE has been promoted to an Associate with VAA. A leading Project Manager and Mechanical Engineer with VAA, David is integral to the success of Industrial, Port and Grain Handling Projects. His experience as a facility operator brings a better understanding of an Owner's needs and project requirements. As an active member of GEAPS (Grain Elevator and Processing Society) Dave is committed to the continued growth and development of new process's and solutions for the grain industry as a whole. He would like to continue to build relationships with Clients, Contractors and Vendors to facilitate successful projects.

KC Harris has been promoted to an Associate with VAA. KC has served as VAA's Accounting Manager and Human Resources Manager for 11 years. KC works closely with our project managers providing valuable information to assist them in their project and budget management. As an Associate, KC will continue in his role as Accounting Manager and will continue to assist VAA strategically as we continued to grow and enhance services in the future.

Jeff Schrock, PE, LEED AP has passed his LEED AP exam and attained LEED® Accredited Professional status. He is proud to be a steward of the LEED accreditation process. His expertise is invaluable in sustainable storm water design and site layouts in all markets as he continues to lead a strong Civil group. Mr. Schrock works with partners and guides owners in implementing sustainable practices into their projects. He assists with identifying opportunities, following guidelines as well as when and how to obtain LEED accreditation. His creative and proactive approach leads to innovative, team-oriented solutions and delivery of the best quality Civil Engineering services to our clients. VAA is proud to be celebrating its 30th Anniversary of offering quality consulting engineering services to the commercial, agribusiness and industrial markets.
